

Addenda to: "THE BIRMAN-KREĬN-VISHIK THEORY  
OF SELF-ADJOINT EXTENSIONS OF SEMIBOUNDED  
OPERATORS", J. Operator Theory, 4(1980), 251—270

A. ALONZO and B. SIMON

In addition to the references given in our paper, we have learned that G. Grubb, *Ann. Sci. Norm. Sup. Pisa*, **22**(1968), 425—513, developed the BKV theory and various extensions to the non-selfadjoint case. Additional results can be found in G. Grubb: *Bull. Sci Math.*, **91**(1970), 113—157; *Israel J. Math.*, **10**(1971), 32—95; *Ann. Inst. Fourier*, **23**(1973), 145—194 and *Ann. Sci. Norm. Sup. Pisa*, **1**(1974), 1—61.

Received July 17, 1981.
